Experience

Senior Software Engineer

UnitedHealth Group, Texas · 2022 – present

- Keep public-facing websites serving millions of college students running reliably, along with the REST APIs, message queues and scheduled jobs behind them.
- Lead modernization of legacy systems, migrating applications onto Azure and containerized environments.
- Design scalable Angular and .NET architecture for new applications.
- Mentor junior developers to raise team velocity and code quality.
- Conduct thorough code reviews to uphold high development standards before deployment.
- Collaborate with business analysts and QA teams to deliver robust, production-ready solutions.

Software Analyst

Calpine Corporation, Texas · 2013 – 2022

- Built cross-platform mobile apps that power plant operators relied on for meter readings and inventory management.
- Led the migration of the team's applications to Azure cloud infrastructure.
- Gave senior management the reporting they needed through SQL reports in SSRS and Power BI.

Education

M.S. in Software Engineering

University of Houston–Clear Lake · 2011 – 2013

- Specialized in the software development life cycle and software design patterns.
- Graduate teaching assistant and research assistant for robotic design and application development.
- STEM scholarship recipient throughout the program.

B.S. in Computer Science

University of Houston–Clear Lake · 2008 – 2011

- Scholarship recipient from 2009 to 2011.
- Designed and developed an e-commerce website as a capstone project.
